

Millie Haffety

Final project – Creative brief:

- For my final project I am making a website about fitness. I will do a section on a healthy recipe and a section on a specific work out. I have a passion for fitness and having a healthy lifestyle so thought it would be fun to put a website together based on this.
- This website is for anyone who is looking to improve their fitness or who needs tips on healthy living.
- We are doing this final project to put together all the skills and knowledge we have learned in this class and showcase it as a final website.
- This website will be put together using the application Atom. For this final project we will be using html, CSS and JavaScript. I will create this final project by the deadline, which is May 7th. Before that however, I will turn in this creative brief which is due April 22nd.
- This website will be published onto the internet via GitHub and will be used on there.
